

Commercial Clearance

The Client Requirements

The client required a complete solution including dismantling the old fittings and packing them up for relocation, along with clearing all rubbish from site. This process needed to be completed as efficiently and safely as possible so, the refit could be commenced on time. This process had to be completed whilst the store was opened to the members of the public.

The Challenge

The main challenges of this commercial clearance were removing the waste quickly, safely and cost effectively. The shop is located in the main shopping area of Glasgow with nowhere to locate a skip. There were also a lot of hazards, as the clearance took place during normal trading hours.

The Solution

ADC's clearance team were able to deliver an efficient service, which ensured the site was cleared on time and to budget, ready for the Shopfitters to commence work. The team were able to park the purpose-built vehicle in the loading area, so waste could be cleared immediately as there was no appropriate location for a skip on site.

The result

ADC offered a one-stop solution to completely clear the site. Whilst ensuring that the Shopfitters could commence works on time. Finally, all works complied with all health and safety regulations whilst the store was opened to members of the public.
